

# COBRA METALLIC PIGMENT

## DESCRIPTION

Cobra Metallic Pigment is a specially designed pigment composed of mica nano-particles coated with organic and inorganic pigments to create many different types of finishes. This pigment has been designed to be mixed with clear, high-solid resinous floor coatings to create a pearlescent finish in a wide range of colors.

## ADVANTAGES

- Original artistic gesign effects.
- Pearlescent & Metallic luster.
- Easy blending & installation.
- Multi-dimensional color effects.
- High temperature resistance.
- Exceptional light fastness & weather resistance.

## CHARACTERISTICS

<b>Color (<math>\Delta E &lt; 1.0</math>)</b>	Multi-Angle Spectrophotometer (ASTM E1866)	Pass
<b>Particle Size (10-100 <math>\mu\text{m}</math>)</b>	Particle Size Distribution (ASTM D8090)	Pass
<b>Odor</b>	Olfactory (ASTM D1296)	Odorless
<b>Toxicity</b>	Acute Toxicity (ASTM E729)	Non-toxic
<b>Titanium Dioxide</b>	Base Pigmentation Type	Rutile
<b>Light Fastness</b>	Light Fastness of Colorants (ASTM D4303)	5-8 *

## COVERAGE RATE

Metallic Color Pigments™	Mixed Coating Material	Coverage Area (Square Feet)
4oz unit	1 Gallon	50 - 75 ft <sup>2</sup>
8oz unit	2 Gallon	100 - 150 ft <sup>2</sup>
12oz unit	3 Gallon	175- 225 ft <sup>2</sup>
8oz unit	4 Gallon	250 - 300 ft <sup>2</sup>

\* All Coverage Rates are guidelines and may vary for each installation.
