

Decorative Flooring

Cobra Polymers offers a range of decorative flooring systems to suit your specific needs. Our range includes non-slip decorative PVA flake systems, glitter flooring system, quartz systems and our metallic systems where a custom, decorative and creative flooring system can be installed.

Cobra Quartz Binder

Cobra Quartz Binder is a pigmented two-component epoxy resin binder for liquid tight terrazzo synthetic resin screeds and mortars, which offers excellent workability, as well as very good mechanical properties.

The product can be used together with suitable quartz aggregates as a clear or pigmented binder for specific uses as a mortar, or as a binder for a colored synthetic epoxy resin terrazzo.

Cobra Metallic Epoxy - Fast Cure

Cobra Epoxy Metallic – Epoxy Only is used in the Metallic Flooring system to create decorative flooring systems. This can be used in a wide range of applications to produce custom and creative floors.

Cobra Metallic Epoxy is made of 100% solid epoxy that is solvent free and has low odor during application. A clear base product that can be mixed with our wide range of metallic colors.

This is the epoxy system only, metallic pigment sold separately.

Cobra Metallic Epoxy is ideal for interior installation and create a long lasting, durable, chemical resistant floor finish which require low maintenance.
