

Epoxy Coatings

Cobra Polymers offers a range of 100% solid epoxy, standard-build and high build epoxy coatings designed to be laid in a seamless application to protect the concrete substrate in commercial and industrial environments. Our epoxy high-build coatings are solvent free with low odor are extremely durable, chemical resistance and provide a hygienic seamless finish.

Cobra Polymer Epoxy Coating Systems have been formulated and manufactured to the highest of quality standards and are available in a range of unlimited colors in either standard cure or fast cure.

Cobra Universal Coating

Cobra Universal Coating is a un-pigmented, ready to use, solvent free, two component, high-grade epoxy resin coating which can be broadcast with both silica and quartz sand at certain thicknesses to deliver an anti-slip finish.

Installed using a suitable squeegee, floor paint roller and paint brush, Cobra Universal Coating produces a tough, joint free, non-porous gloss finish floor coating, which is easy to clean, exhibiting excellent UV resistance and good protection against fuels and lubricants as well as most solvents, acids and alkalis at certain concentration levels.

Cobra Epoxy Coating - Fast Cure

Cobra Epoxy Coating is a clear two-pack solvent free, high build epoxy resin coating which provides an extremely hard wearing, chemical resistance surface. Manufactured from 100% Solid Epoxy.

Cobra Epoxy Coating has a low-odor during application and provides a seamless hygienic floor surface when cured. Cobra Epoxy Coating is easily applied and provides a tough, resilient, corrosion and abrasion resistant finish.

Cobra Epoxy Coatings for ideal for interior installation and create a long lasting, durable, chemical resistant floor finish which require low maintenance. This systems is available in a range of coating thickness (between 100 – 150 Microns) depending on the durability required. A PVA flake can be incorporated within the coating during application to provide a decorative finish. 2-3 hour curing time.
