

Primers & Sealers

Cobra Polymers offers a range of superior epoxy primers that provide better adhesion that penetrates the concrete substrate, seals, and strengthens your floors to form an optimal bond to any subsequent floor coating system that is applied.

An epoxy primer acts as the layer that will build upon with other base coats and topcoats. Without a primer, your epoxy system will not work no matter what type of epoxy you are applying.

The best flooring installations starts with a Cobra Polymer primer.

Cobra Moisture Barrier Universal Primer

Cobra MB Universal Primer is a two-coat, solvent-free, epoxy damp proof membrane designed as a priming coat prior to the installation of epoxy and polyurethane resin systems. Cobra MB Universal Primer can be used as a standard primer with just a single coat or as a Moisture Barrier Primer when a second coat is added.

Cobra MB Universal Primer is designed for use on cementitious substrates with a moisture content of up to 6%. The material is pre-filled and ready to use. Cobra MB Universal Primer can be used as a standard primer with just a single coat or as a moisture barrier primer when a second coat is added.

Cobra Epoxy Primer - Fast Cure

Cobra Epoxy Primer Fast Cure is a solvent free two-part component primer. This product offers a high level of adhesive and cohesive bond strength properties for the installation of epoxy, polyurethane and polyurea resin systems.

Cobra Epoxy Primer Fast Cure has been specially formulated with a faster curing time than most standard Epoxy Primers. With a curing time of just 2-3 hours this allows for minimal downtime during installations.

A solvent free, hard-wearing and durable product make this system ideal for installation in almost any area.
